

# Recommended Teaching & Learning Pathway

for using the Superflex® Series and the *Superflex Curriculum*

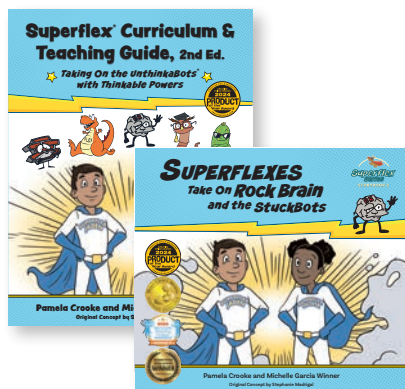

## 3-Step Pathway for kids ages 5-10\*

1

Use the Social Detective storybook and Teaching Curriculum first to introduce key Social Thinking concepts/Vocabulary to build social awareness.

2

After building social awareness and a social vocabulary, depending on the age of your student, introduce Superflex to teach strategies for self-regulation in a superhero-themed format.

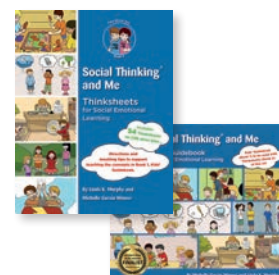

3

Use any other Superflex books, games, and visuals AFTER teaching the Superflex Curriculum to take learning to a deeper level.

## If you're working with kids ages 9-12

*Social Thinking and Me* is used BEFORE or alongside teaching the *Superflex Curriculum*. This two-book set helps deepen students' understanding of core Social Thinking concepts and gives them lots of practice to build stronger social competencies.

\*Some younger kids with social learning differences may need more time building their Social Detective skills.  
Wait to start Superflex with them until around age 8.
